Sizlere sunacaklarımız bu kataloglarla sınırlı değildir. Alet ve setlerinizin bakım ve onarımı, mevcut dizaynlar üzerinde değişiklik istekleriniz, yeni cerrahi teknikler için geliştireceğiniz aletlerin üretimi ve bu katalogta yer almayan diğer ürünler için teknik olanaklarımız, bilgi ve deneyimlerimiz daima emrinizde olacaktır.

Tıp camiasına ve bu katalogun hazırlanmasında emeği geçenlere öneri ve eleştirileri ile bizleri yönlendirenlere teşekkür ederiz.

Being established in 1983 in Samsun / Turkey, BAHADIR Medical Equipment has been recognized as a leader in the production of Surgical Instruments for its exceptional quality products, sales and wide range of service organization.

All instruments pictured in this catalog are the products of consistent craftsmanship combined with advanced production techniques and traditional skills acquired over the years. Forging to crafting-utmost care has been taken to ensure accuracy in every stage of production and our strive continues to achieve highest standards and top quality products. Instruments displayed here are stainless steel and they are shown in full scale unless otherwise indicated.

BAHADIR enjoys a significant reputation of manufacturing instruments for all surgical branches, thanks to close cooperation and support from our medical society which made them competitive international markets.

In addition to this catalog, we also have supplemental catalogues for ENT, Edoscopy and Steril Container System available on request. We are, however, conscious of the fact that this catalog remains insufficient to cover all the facilities and novelties we can offer. It is our endeavor to develop new products as new technology and demands for new procedures become known.

We will always be at your disposal with our technical facilities knowledge and vast experience for your specific needs including refurbishment of your instruments and sets, modification of present patterns, custom-made production on entirely new designs developed to your surgical techniques as well as any other product which is not displayed here.

BAHADIR would like to thank all those who have co-operated in the compilation of this catalog.

Çalışması :

Arzu edilen (ihtiyaç duyulan) vakum miktarı ayarlama vidası ile sürekli olarak istenilen değere ayarlanabilir. Vakum oluştuğunda bu vakumun emme kafalarına uygulanması için hızlı-kesme düğmesinin sağa veya sola basılması ile sağlanır. Ayarlanan vakum değeri vakum ayar vidası ile değiştirilebilir. Emme işleminin aniden durdurulması isteniyorsa hızlı-kesme düğmesi kapatılır. Böylece emme kafasına gelen vakum kesilmiş ve emme kavanozuna akış durdurulmuş olur.

Function:

The vacuum required can be constantly preset by the adjusting screw. This vacuum exists then up to the closed quick-shutter, thus the vacuum in the suction head is pressed from the left to the right, the nounted suction head is immediately put under the preset vacuum. In case the preset vacuum has to be changed, this can be done with the adjusting screw. For immediate removal of the suction head simply close the quick-shutter, thus the vacuum in the suction head is eliminated at once whereas the vacuum in the suction jar remains unchanged.
